

Please keep XM Satellite Radio the way it is. XM is the reason I went away from AM/FM radio. I have no problem paying for the programs and music channels I enjoy listening to without commercial interruption. I also travel quite frequently from Washington, D.C. to Boston, MA. The traffic and weather update channels that XM radio provides is excellent. And I don't have to search up and down the dial looking for the station I want and potentially causing an accident on the road. Instead, I can get the update that I need and XM will immediately report it and I wouldn't have to wait for the 15-30 minutes of commercials that AM/FM radio stations broadcast. XM Radio is actually making the American roads safer for everyone to travel. Please don't let the NAB ruin a great thing. -C. Welsh
